SUMMARY

Final-year Computer Science Engineering student (Expected Graduation: May 2027) with hands-on experience building scalable full-stack applications using Java, Python, React.js, TypeScript, and Firebase. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, and Software Engineering.

EDUCATION

JSS Academy of Technical Education, Bengaluru

Bachelor of Engineering in Computer Science and Engineering

2023 – 2027

CGPA: 8.24/10

PROJECT EXPERIENCE

Fake News Analysis System

2026

React, TypeScript, Vite, AI APIs, HTML, CSS

[GitHub Repository](#) — [Live Demo](#)

- Developed a React-based Fake News Analysis System that analyzes news articles in real time and generates authenticity scores using AI APIs.
- Built an interactive frontend using React and TypeScript, providing users with real-time news credibility predictions.
- Integrated external AI APIs to analyze news content and generate authenticity scores with detailed insights.
- Designed a responsive and user-friendly interface using Vite, HTML, and CSS to enhance accessibility and performance.
- Applied component-based architecture and API integration to deliver a scalable and maintainable web application.

Inventory Management System

2025

React, JavaScript, Firebase, HTML, CSS

[GitHub Repository](#)

- Developed an inventory management system to automate product tracking and stock management.
- Implemented real-time inventory updates using Firebase, ensuring synchronized data across users.
- Added low-stock alerts and inventory monitoring features to improve stock availability and operational efficiency.
- Designed responsive dashboards for managing products, inventory status, and stock updates.
- Utilized React and Firebase to build a scalable, user-friendly web application for efficient inventory management.

TECHNICAL SKILLS

Programming Languages: Java, C, Python, JavaScript, TypeScript

Frontend: HTML, CSS, Tailwind CSS, React.js, Next.js, Vite

Backend: REST, API Integration

Databases: SQL, Firebase Firestore

Tools & Platforms: Git, GitHub, VS Code, Firebase, Vercel, Netlify, Canva, Figma

Core CS: Data Structures and Algorithm, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Soft Skills: Problem Solving, Team Collaboration, Communication, Agile Methodology

CERTIFICATIONS

- GeeksforGeeks GFG 160 Certification – [Certificate](#)
- Machine Learning Specialization (Stanford University & DeepLearning.AI) – [Certificate](#)

ACHIEVEMENTS

- Solved 100+ **Data Structures and Algorithms** problems across [LeetCode](#) and [Codolio](#).
- Developed and deployed real-world projects including a **Fake News Analysis System** and an **Inventory Management System** using React, TypeScript, Firebase, and AI APIs.
- Maintained a CGPA of **8.24/10** in Computer Science and Engineering.
